ALI lines up 67 projects worth P90 B

ALI LAYS OUT 67 PROJECTS WORTH P90 B — Ali Rodriguez Duterte, president of the Ali Group, laid out 67 projects worth P90 billion during a press conference in Manila on Wednesday. The projects, which include infrastructure, housing, and commercial developments, are spread across various regions in the Philippines. Rodriguez Duterte emphasized the group's commitment to sustainable development and economic growth.

By JENNIFER DELA CRUZ

Noting the trend of a recovering financial performance last year, property giant Ali Group (AGI) is setting its sights on a new path to not just its new projects, but an unprecedented potential value of around P10 billion in its efforts to cover all fronts and develop a large and more viable real estate portfolio.

During the company's annual stockholder meeting, Rodriguez Duterte said they are developing a portfolio of assets expected to earn a return on the investment in both government and private sectors.

AGI president Duterte said AGI is looking at the new development and expansion of its existing projects, particularly in the infrastructure sector, which is expected to be a major driver of growth. He also mentioned the group's interest in the real estate market, particularly in the high-end segment.

PAL execs exit to give SMC free hand in management

By JENNIFER DELA CRUZ

Key executives of Philippine Airlines (PAL) have exited the company, leaving the airline's management in the hands of the Singapore-based Singaporean Management Corporation (SMC). The move is expected to give SMC a free hand in managing the airline's operations.

SMC, which is a subsidiary of the Singapore-based Singaporean Management Corporation (SMC), has been managing the airline's operations since its takeover in 2008. The company has been working to improve the airline's financial performance and operational efficiency.

The exit of the key executives is a significant move, as it allows SMC to implement its own management strategy without any internal resistance. This move is expected to lead to a more streamlined and efficient management structure for the airline.
